

Alocit 28.15 Underwater Epoxy Coating System

Gage Roads Diving P/L and Franmarine Underwater Services P/L (GRD Franmarine) is pleased to offer a reliable method of epoxy paint repair for underwater steel structures, where the primary paint system has failed or corrosion has become an issue.

After extensive trials GRD Franmarine is pleased to confirm the product meets the manufacturers specifications and we are satisfied Alocit 28.15 offers a long term, viable corrosion protection solution to most Ferrous sub-sea structures including Ships, Piles and Sheet Pile etc.
